SYSTEM MATIC

Check what holder you have in your machine. Measure the height, from the bottom of the foot, to the screw that secures the handle to the needle bar. If the distance is about 1.5 cm, it means that we have a low type of foot mounting in our machine. The vast majority of household machines have this type of handle. If the distance from the bottom of the mounted foot to the screw is approximately 2.5 cm, it is a high foot mount.
